

WILLIAMS DIRECT VENT WALL FURNACES

Williams

Compact Direct Vent Gravity Wall Furnaces

Uses natural gas. Compact, space-saving direct-vent heaters feature low cost installation. These models do not use any indoor air for operation. Sealed combustion chamber design is ideal for add comfort to individual rooms, only when heat is needed such as garages and workshops.

FEATURES:

- No electricity required.
- "Matchless" pilot igniter.
- Heavy-duty, cast iron burners.
- Ready to install – all vent material included.
- Long-life, ceramic-coated combustion chamber.
- Direct vent safety – gas flame is completely sealed inside, away from all contact with room air. Air necessary for combustion is drawn into the chamber from outside through the direct wall vent. All combustion products are vented directly to the outside. Windows and doors can remain closed because no room air is used for combustion.
- Automatic thermostats included with all models. Choose a self-generating millivolt wall thermostat or self-contained bulb thermostat with full range of adjustment on the gas valve dial.
- 100% safety shut-off standard.
- Light, powder-coat, scratch-resistant contemporary finish blends with any décor.

NOTE: All units have 1/2" gas connection.
